John Carey, Chancellor

Memorandum

To: Chief Academic Officers and Provosts
From: Dr. Paula Compton, Associate Vice Chancellor, Articulation and Transfer
Date: March 21, 2018
Subject: Survey of Welding CTAN Learning Outcomes

Below you will find a link to a survey of endorsement for the learning outcomes of four revised CTANs in Welding. The CTANs included in this survey are:

1. OXY-Fuel Welding and Cutting
2. SMAW (STICK)
3. GMAW (MIG)
4. GTAW (TIG)

Please forward this memo and all supporting documents to a faculty member that you choose to provide feedback on behalf of your institution. This person should not speak for himself or herself, but for the institution when completing the survey. The appropriate faculty should be familiar with course offerings in welding and the courses listed above. **If your institution does not offer this program, you can opt out of the survey after the second question.**

A faculty panel updated the statewide learning outcomes for welding. This survey is requesting the endorsement of learning outcomes only. Each learning outcome is listed for each CTAN. We are asking the faculty member to indicate if the learning outcome is essential, necessary but not essential, not necessary for the course. The final questions on the survey ask for feedback on student assessment, secondary program accreditation, and instructor certification for welding.

Please arrange to have an appropriate person at your institution complete the survey as soon as possible but no later than April 13, 2018.

A PDF file of the survey is also attached for reference only. Please do not use the PDF version to respond to the survey.

Thanks in advance for your assistance. If you have any questions, contact Anne Skuce, askuce@highered.ohio.gov or (614) 644-6839.
